

CTR350 Cellular Travel Router

Broadband to Go!

Take your own personal WiFi connection with you wherever you go—with the **cradlepoint** CTR350 Cellular Travel Router. The CTR350 gives you the added flexibility of using your cellular phone to access the Internet when hotel or office broadband is unavailable. Don't get caught without a connection when you really need to download that file or send that report.

The CTR350 has standard PPPoE support for managing your DSL or Cable modem, or plugging into a single Ethernet LAN connection for backhaul. Plus, it provides superior Cellular Handset compatibility to provide connectivity to the Internet using the latest 3G handsets (EVDO and HSDPA).

How it Works:

Connect a data-ready cellular phone into the USB host port, and the CTR350 automatically establishes a connection to your cellular provider's data network. It works similar to the way a home router manages a DSL or Cable modem—connect and forget. Once plugged in, associate your PC with the CTR350 just like you connect to your home WiFi network or a Café Hotspot, and you're instantly on the Internet. You can optionally set the Ethernet Port mode to LAN, and connect your PC directly to the Ethernet port and enjoy a no-software, no-hassle, secure Internet connection. Enjoy the broadband speed

built into your advanced cellular phone, and use your laptop wherever you are.

Business Ready

The CTR350 is a full-featured wireless router, and supports mission-critical applications including enterprise class pass-through VPN connections. **cradlepoint's** technology allows you to experience the freedom and power of the 3G mobile broadband networks without the connection hassles.

Simple and Secure

The **cradlepoint** CTR350 ensures security through use of 128-bit WEP or WPA encryption. The built-in setup wizard helps walk the user through good/better/best security setup to make sure

their connection is secure. Plus, the built-in firewall insures that cellular bandwidth isn't compromised regardless of the level of security in use.

Take to the Road

The CTR350 is thin and sleek—0.8" thin and sized to pack with you. It easily slips into a briefcase and is ready to go with you on business trips—or plug into your car adapter and let passengers enjoy Internet access while on the road. An added bonus is that it charges your handset to keep your talk time topped-off.

Features

- Wi-Fi Compliant with IEEE 802.11 b/g Standards
- 10/100 BASE-T Ethernet Port
- 3G handset support for all major networks and devices capable of supporting Tethered Data / Phone-as-Modem
- Firewall features Network Address Translation (NAT), and Stateful Packet Inspection (SPI) protects against Dos attacks
- Traffic Shaping and Limiting Control
- UPnP (Universal Plug & Play) and ALGs Support for Internet applications such as Email, FTP, Gaming, Remote Desktop, Net Meeting, Telnet, and more
- Provides Additional Security of Enable/Disable SSID, Internet Access Control (Services, URL and MAC Filtering)
- Supports Multiple and Concurrent IPSec, L2TP and PPTP VPN Pass-Through Sessions
- Flash Memory for Firmware Upgrade, Save/Restore Settings
- Easy Management via Web Browser (HTTP) and Remote Management
- Supports 64/128-bit WEP (11b/g), WPA/WPA2, and WPA-PSK/WPA2-PSK
- Compliant with Windows 98SE/NT/2000/XP/2003 Server, Linux and Mac OS

Specifications

Model #:	CTR350 Cellular Travel Router
WiFi Standards:	IEEE 802.11 b/g
Phone Connection:	Requires 3G handset with USB data connection
Network Connection:	10/100 BASE-T
Buttons / Switches:	One 3-position OFF/WAN/LAN switch One reset button (recessed)

4 LEDs:	Power, WLAN Status, LAN Status, WiFi Status
Dimensions:	3.6" x 2.8" x 0.8 (92 mm x 70 mm x 19 mm)
Weight:	4.0 oz.
Certifications:	FCC, WiFi Alliance
Operating Temp:	0 C to 50 C
